	28 x 20 x 8 cm	3 – 4
	14 x 12 x 4 cm	1
	20 x 17 x 6 cm	1 – 2
	25 x 22 x 7 cm	3 – 4
	14 x 12 x 5 cm	1
	20 x 18 x 7 cm	1 – 2
	26 x 23 x 8 cm	3 – 4

With Pyrex Cook&Heat, you can cook, preserve and **re-heat in the microwave** easily thanks to its **patented lid with valves**. You can cook your dish in the oven and store it directly in the fridge or the freezer, because of the borosilicate glass technology which resists to thermal shock. The **simple and practical design** fits to all type of kitchen and prevent glass for breakages.

Resistant to **-40°** and to a heat up to **300°C**.
Resistant to thermal shock up to **220°C**.

A thermal shock is a sudden change of heat of a material which must cause bursting. It means that you can take out your dish from the freezer at -10° and put it directly in the oven at 200° without any risk of breakage, because the difference between the heat and the cold is inferior to 220°

Why a storage box in borosilicate glass ?

The glass is a not porous material which guarantees an **hygienic cooking** use after use. Thanks to its **transparency** it is easier to wash and to monitor your cooking process.

The borosilicate glass is well known to have a superior chemical and **thermal resistance** than any other glass. Its quality allows to offer lightness and **durability**. Every experts recommend this kind of glass for extreme temperatures.

Moreover it is a **bisphenol A free** material.
